

PRESS RELEASE

GVS INTRODUCES THE NEW ELIPSE® FULL FACE MASK, REDEFINING PERFORMANCE IN RESPIRATORY PROTECTION

Zola Predosa (BO), 18th of July 2024

GVS S.p.A., a leading provider of advanced filtration solutions for highly critical applications, proudly unveils the latest addition to its product portfolio, the Elipse® Full Face Mask. Engineered for top performance with user-centric design at its core, the Elipse® Full Face Mask sets a new benchmark in respiratory protection, catering to the evolving needs of modern industries.

Weighing only 346g, the Elipse® Full Face Mask stands out as one of the lightest full-face masks available in the market today. This remarkable feat underscores GVS's constant commitment to innovation and excellence, delivering a product that prioritizes both performance and comfort.

At the heart of the Elipse® Full Face Mask lies an innovative design aimed at addressing key user concerns, particularly in the area of visibility. By strategically lowering the filter position integrated into the mask body, GVS has significantly enhanced user safety, ensuring clear visibility of obstacles while maintaining optimal performance.

The Elipse® Full Face Mask stands out for its sleek design, which not only facilitates use but also allows users to seamlessly integrate additional Personal Protective Equipment (PPE) such as safety helmets or welding visors, ensuring complete protection in diverse work environments.

Crafted with precision, the visor of the Elipse® Full Face Mask features over-molded soft silicone material, delivering unparalleled comfort, superior voice transmission, and a secure fit for extended wear.

The Elipse® Full Face Mask is compatible with a wide range of filters including P3, nuisance P3, A1P3, A2P3, and the latest addition, the low-profile ABEK1P3 filter, addressing the requirements of the most demanding environments.

The commercial launch of the Elipse® Full Face Mask is planned for the second half of FY 2024.

Pierre Dizier, VP of Health & Safety GVS Division, commented:

“With the Elipse® Full Face Mask, GVS continues to set the standard for excellence in respiratory protection, combining cutting-edge technology with unparalleled comfort and functionality. This important addition to our product range will double our addressable negative pressure global respirator market from 500 million \$US to an estimated 1 billion \$US.”
