### **2024 – 1<sup>st</sup> Half Neurosoft Group Consolidated Performance**

Neurosoft's reported H1.2024 consolidated revenues equal to € 16.22 million, an increase of 37% compared to H1.2023. The main factors that drove this top line growth are: the securing of significant contracts combined with the successful capitalization of the company's efforts in developing an innovative solutions portfolio, along with in Greece.

The Gross Profit landed at €3.19 million (19% growth) better-off compared to the respective amounts of previous year 1<sup>st</sup> semester. The EBITDA reached the amount of €1.20 million and the Net profit stood at € 0.27 million marginally lower compared to H1.2023. The lower EBITDA and EBIT figures are due to the fact that, in 2024, the company secured major infrastructure projects, where the first phase of implementation involves the resale of goods, which is inherently a low-margin business line.

H1.2024 Net Debt amounted to € 1.47 million, as compared with € 0.56 million at 30th June 2024.

H1.2023 Equity is equal to € 6.92 million (€ 6.64 million in 2023).

**Cyber Security:** Revenue and profitability have surpassed the H1 2024 performance targets. As cyber threats continue to evolve, Neurosoft remains at the cutting edge, providing clients with the most advanced cybersecurity solutions. The segment's performance in 2024 underscores our steadfast dedication to safeguarding clients' digital assets amid a growingly complex threat environment. Our solutions portfolio has been bolstered with new services, including Security by Design, VMaaS, and Ransomware assessment, which have generated additional revenue streams and secured new projects with numerous Tier 1 clients.

**Field Services Operation:** The company remained committed to its strategic goal of helping telecom organizations and enterprises with geographically dispersed infrastructures overcome their key challenge: maintaining smooth, continuous, and cost-effective operations. To achieve this, Neurosoft focused on technological optimization within the FSO business unit, investing in the modernization of the Warehousing Management System to establish a cutting-edge logistics center and improve service quality for both enterprise and telecom clients. Additionally, the Group expanded its national network to support multiple large-scale retail projects across the country simultaneously.

**Infrastructure and Cloud Operations:** The ICO segment experienced significant revenue growth, driven by rising demand for scalable and secure solutions. By maintaining a strong focus on facilitating digital transformation, Neurosoft has reinforced its market position and established strategic partnerships with major industry players. The company has continued to innovate, introducing advanced cloud solutions that provide businesses with enhanced agility, scalability, and security. The growth achieved in H1 2024 highlights Neurosoft's dedication to equipping businesses with the tools and technologies essential for success in the digital era.
