

EUROTECH: CONSOLIDATED FINACIAL REPORT AS AT 30 JUNE 2024 APPROVED BY THE BOD

Revenues up in second quarter compared to first, but still down from last year. First margin confirmed at target levels. Adjusted EBITDA at break-even in second quarter due in part to first effects of operating cost reduction actions.

Amaro (Italy), 13 September 2024

- Consolidated revenues of € 29.3 million (€ 47.9 million as at 30.06.2023, -37% at constant exchange rates)
- Consolidated gross profit of € 14.5 million and 49.7% of revenues (€ 22.3 million and 46.6% of revenues as at 30.06.2023)
- Consolidated EBITDA of € -3.5 million (€ 2.7 million as at 30.06.2023)
- Consolidated EBITDA adjusted of € -3.1 million (€ 2.7 million as at 30.06.2023)
- Consolidated EBIT of € -5.8 million (€ 0.01 million as at 30.06.2023)
- Group net income of € -5.5 million (€ -0.9 million as at 30.06.2023)
- Net debt of € 23.3 million (€ 20.6 million as at 31.12.2023)

The Board of Directors of Eurotech S.p.A. today examined and approved the results of first six months of 2024.

Trend of the period

Three major phenomena have occurred in the target markets that Eurotech oversees: the first phenomenon is the freezing of capex in Industrial Automation pending a reduction in interest rates, which has led the whole sector to record a YoY drop between 20% and 25% rather evenly worldwide; the second phenomenon is the delay in the construction of new chip plants, which has led to a sharp drop in business for all semiconductor machine manufacturers; the third phenomenon is the sharp acceleration in demand for generative AI datacenters, which has driven revenue for those operating in cloud infrastructure but has not yet impacted the edge.

Against this background, sales revenues in the first half of the year were still affected by the factors already highlighted in the first quarter: the phase-out of the legacy embedded business in the United States; destocking and softness in the Japanese industrial sector, which in the first months of last year had instead benefited from the opposite phenomenon of product

accumulation by customers; and the wait-and-see attitude of customers in allocating their budgets in Europe.

The first half of the year showed revenues down 37% at constant exchange rates compared to the same period last year, an improvement over the 50.4% decline recorded in the first quarter. In fact, the second quarter recorded revenues of €17.3 million, a marked improvement over the first quarter's performance.

The Edge AIoT business proved to be much more resilient than the traditional Embedded business, and in the first six months it took a decisive role in the composition of revenues, reaching 57% of the total.

The actions to improve procurement put in place over the past few years continue to yield the expected results on the first margin. Thanks in part to price increases to customers and a shift in sales mix toward higher-margin products, the first margin reached 49.7% in the first half of the year, an improvement of 310 bps over the same period in 2023.

In terms of adjusted EBITDA, the second quarter basically reached the break-even point, and as a result, the adjusted EBITDA figure for the half-year is in line with that of the first quarter. The second-quarter result was also made possible by the decrease in operating costs, which began to benefit from the effects of the operational structure rationalization actions begun in the U.S. at the end of 2023 and extended to the entire Group in May 2024.

Operating costs decreased by €1.27 million compared to the first six months of 2023, a figure that becomes €1.68 million net of nonrecurring costs related to the Group's reorganization activities, especially one-time personnel costs related to the reduction of the workforce and some service costs incurred to facilitate and speed up this reorganization. On an annual basis, the total expected benefit for 2024 is about €3.5 million compared to the twelve months of 2023.

Economic performance of the Eurotech Group

Consolidated revenues for the first six months of 2024 were € 29.26 million, compared to € 47.89 million in the first semester of 2023. The period-to-period decrease in sales was 38.9% (37% at constant exchange rates), an improvement over the -52.1% variance in the first quarter (-50.4% at constant exchange rates).

With reference to the **breakdown of revenues by location of the Group's activities**, Europe is the most significant area and recorded a 57.8% contribution to the Group's revenues (first semester 2023: 38.5%); the Japanese area is in second place and contributed 24.2% of total revenues (first semester 2023: 26.6%); lastly, the American area accounts for the remaining 18.0% (first semester 2023: 34.9%).

The **first margin** for the period amounted to €14.54 million, accounting for 49.7% of revenues. In percentage terms, the figure compares with 47.4% for the twelve months of 2023 and a value of 46.6% for the first half of 2023. The 310 bps increase in percentage margin is due to the mix of products sold, actions on component purchase prices, and actions on sales prices to customers.

Operating costs in the first six months of the year, before adjustments made for capitalization of development activities of €1.80 million (€1.64 million in H1 2023) and nonrecurring costs of €0.41 million (not present in H1 2023), amounted to €20.11 million, compared to €21.38 million in H1 2023. Net of non-recurring costs, the total value of operating costs amounted to €19.70 million.

EBITDA in the first six months 2024 net of nonrecurring costs (EBITA Adjusted) amounted to € -3.08 million (-10.5% of revenues) compared to € 2.70 million (5.6% of revenues) in the six months 2023. EBITDA for the first six months of 2024 considering non-recurring income statement items amounted to € -3.49 million (-11.9% of revenues).

EBIT for the first six months, i.e., operating income, was € -5.84 million (-20.0% of revenues) compared to Euro 13 thousand in the first six months of 2023.

The Group's **net income** amounted to € -5.51 million (it was negative € 0.94 million in the first six months of 2023) and its ratio to revenues was -18.8%.

Balance sheet and financial situation of the Eurotech Group

The Group's **cash and cash equivalents** amounted to €5.6 million as of June 30, 2024, while they were €11.4 million at the end of 2023. €5.3 million was used for the partial repayment of loans with banks according to their due dates against €0.45 million as new loans signed.

As of 30 June 2024, the Group had a **net financial debt** of €23.3 million, compared to an amount of €20.6 million as of 31 December 2023. The change in net financial position was

mainly due to cash utilization of €2.24 million for capital expenditures and €3.24 million for net repayment of loans payable.

Net working capital amounted to €20.3 million as of 30 June 2024, compared to €23.9 million as of 31 December 2023. The reduction in working capital is mainly related to a greater reduction in current assets than in current liabilities. The ratio of net working capital to sales for the last 12 rolling months was 27.0%.

Group shareholders' equity amounted to €86.1 million (€95.3 million as of 31 December 2023).

Foreseeable evolution of operations

A low visibility environment remains, with customers releasing orders for the bare minimum in the short term. However, the past 4-5 months have seen a noticeable increase in customer interest in discussing new business opportunities and bid requests compared to the first quarter, which should translate into an increase in the order book in the months ahead. This dynamic bodes well for a resumption of growth in 2025.

Sales in the second half of the year will be higher than in the first half, but will still be impacted by softness in Japan and the phase-out of legacy embedded business in the United States.

The procurement cost control processes in place and visibility into the mix of products sold suggest that in the next two quarters the first margin as a percentage will maintain values close to those recorded in the first half of the year.

Actions to rationalize the operating structure will make their benefit felt in terms of cost reduction, with a more pronounced effect than we began to see in the second quarter: the target announced in May to lower the Group's run-rate by about €4 million in 2025 compared to 2023 remains confirmed.

The Manager in charge of drawing up the corporate accounting documents, Sandro Barazza, hereby certifies, pursuant to paragraph 2 of Article 154-bis of the Consolidated Law on Finance, that the accounting information contained in this press release corresponds to the documented results, books and accounting records of the company.

Eurotech

Eurotech (ETH:IM) is a multinational company that designs, develops and delivers Edge Computers and Internet of Things (IoT) solutions complete with services, software and hardware to system integrators and enterprises. By adopting Eurotech's solutions, customers have access to components and software platforms for IoT, Edge Gateways to enable asset monitoring, and high-performance Edge Computer for applications including Artificial Intelligence (Edge AI). To offer more and more complete solutions Eurotech has activated partnerships with leading companies in their field of action, thus creating a global ecosystem that allows it to create "best in class" solutions for the Industrial Internet of Things.
